

PUBLIC EDUCATION SURVEY – CONSTRUCTION PROGRAM

---

1. True or False. Receiving water bodies, such as the ocean, may be polluted when storm water runoff carries contaminants from construction or industrial activities through the storm drain system.
  - a. True.
  - b. False.
  
2. What is the process called that involves the movement and settling out of suspended soil particles from storm water runoff?
  - a. Sedimentation.
  - b. Movement.
  - c. Rain.
  - d. Erosion.
  
3. Which of the following is a consequence of excessive sedimentation discharge to the receiving water?
  - a. Damage to the coral reef and other aquatic flora/fauna.
  - b. Economic impacts to fishing and tourism industry.
  - c. Regulatory fines.
  - d. All of the above.
  
4. Which of the following is considered a permanent or post-construction BMP?
  - a. Silt fence.
  - b. Stabilized construction entrance.
  - c. Grassed swale.
  - d. Filter fabric.
  
5. Which of the following describes construction projects that must be reviewed by DOTA for compliance with environmental regulations?
  - a. Only projects over 1 acre.
  - b. All projects that meet the definition of construction in SWMPP Section C.
  - c. Only projects that occur in a surface water body.
  - d. Projects that are over 1 acre and will discharge to the storm drain system.
