Bicycles on Buses

You can take your bicycle with you when you ride the bus. Transit buses are equipped with bicycle racks which can carry two bicycles. To use this service, place your bicycle on the front of the bus, climb aboard, and pay the regular fare. This program makes faraway destinations more accessible, gives you freedom of movement, and provides a backup in case of bad weather. For schedule and route information, call TheBus at 848-5555.
