FACT SHEET

REPORTING PROCEDURES

Airport activities and material storage have the potential to contaminate stormwater runoff and surface water bodies via spills and/or leaking equipment/vehicles/aircraft. The procedures outlined in this fact sheet are intended to detail general procedures to be followed in the event of a spill/leak. Please see all current state and federal guidelines for complete details.

Spills/Leaks must be immediately reported per DOH and/or Federal requirements (DOT Airports has additional requirements) if one or more of the following conditions apply:

1. If the release is more than 25-gallons of petroleum product.
2. If the release is 25-gallons or less of petroleum product but is not contained or remedied within 72 hours.
3. If the release is **equal to or exceeds the reportable quantity criteria** for one or more chemicals listed within the DOH HEER Office Technical Guidance Manual (TGM): <https://health.hawaii.gov/heer/reporting/how-to-report-a-release-spill/>
4. If the release enters a storm drain or water body.
