Existing and Proposed Site Features	Yes	NO	N/A
1. The following site features should be included on the plans, if deemed necess	sary bas	sed on p	oroject
type, size, and scope.			
<ul> <li>Existing and proposed topography, features, and storm water flow paths</li> </ul>			
Preliminary location, size in square feet, and limits of disturbance	H	$\Box$	
Locations of existing and proposed roads, curbs, gutters, storm			
drains, inlets, buildings, signs, sidewalks, traffic signals, light			
standards, guardrails, and other structures			
<ul> <li>Location of internal swales and ditches, and other drainage facilities</li> </ul>			
<ul> <li>Maps of predominant soils from USDA soil surveys</li> </ul>			
<ul> <li>Boundaries of existing predominant vegetation and proposed limits of</li> </ul>		_	_
clearing and grubbing			
Existing and proposed utilities and easements	Ш		
Preliminary location and dimensions of proposed channel			
modifications, such as bridge or culvert crossings  2. If the project or site includes, is adjacent to, or otherwise may impact any of			
the following, they should be included on the plans.			
Perennial and intermittent streams or other surface water			
Location and boundaries of resource protection areas such as			
wetlands, lakes, ponds, and other setbacks (e.g., stream buffers,			
drinking water well setbacks, septic setbacks)			
<ul> <li>Location of floodplain/floodway limits and relationship of site to</li> </ul>			
upstream and downstream properties and drainages			
The limits of the existing and proposed maps and plans shall extend			
past the project limits if any existing condition has an impact to the			
project. Include future projects that have the potential to start prior to			
<ul><li>the subject project.</li><li>Stream flow velocity for stream work</li></ul>	H	-	
	<u> </u>		닏
. 3. Identity potential politiants related to non-storm water on site.		1 1	
3. Identify potential pollutants related to non-storm water on site.			
	Yes	No	N/A
3. Identify potential pollutants related to non-storm water on site.  Scheduling  1. Include sequencing of construction activities with the implementation of	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization,	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs	Yes	No	N/A
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November			
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practices)	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practive Preservation of existing vegetation	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practive of Preservation of existing vegetation  • Stabilization of construction entrance	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practive of the protection of existing vegetation  • Stabilization of construction entrance  • Protection of stockpiles	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practive of the project is performed in the p	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following praction)  Preservation of existing vegetation  Stabilization of construction entrance  Protection of stockpiles  Bank stabilization  Topsoil management	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practive of the project of the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following praction)  • Preservation of existing vegetation  • Stabilization of construction entrance  • Protection of stockpiles  • Bank stabilization  • Topsoil management  • Mulching, seeding, and/or planting with installation/application procedures and requirements	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practices)  Preservation of existing vegetation  Stabilization of construction entrance  Protection of stockpiles  Bank stabilization  Topsoil management  Mulching, seeding, and/or planting with installation/application procedures and requirements	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practive of the protection of existing vegetation  Preservation of construction entrance  Protection of stockpiles  Bank stabilization  Topsoil management  Mulching, seeding, and/or planting with installation/application procedures and requirements  Velocity reduction devices in storm water flow paths	Yes	D No	
Scheduling  1. Include sequencing of construction activities with the implementation of construction site BMPs is provided?  2. Show how the rainy season relates to soil-disturbing and re-stabilization activities?  3. Include detail on the implementation and deployment of soil stabilization, sediment control, non-storm water management, construction material management, waste management, pollution control, spill control practices, and inspection and maintenance BMPs?  4. If the project is performed in multiple phases, are the phase-specific BMPs that take into account relevant potential pollutants?  Construction Site BMPs  (Please refer to City and County of Honolulu Storm Water BMP Manual – Construction, November 2011, for more information)  1. Soil Stabilization Practices (Plans address or include the following practice in Preservation of existing vegetation  • Stabilization of construction entrance  • Protection of stockpiles  • Bank stabilization  • Topsoil management  • Mulching, seeding, and/or planting with installation/application procedures and requirements  • Velocity reduction devices in storm water flow paths  • Geotextiles, plastic covers, turf reinforce mats, and/or erosion control	Yes	D No	

	Slope drains, subsurface drains	_	<u> </u>			
•	Top and toe of slope diversion ditches/berms					
	2. Sediment Control Practices (Plans address or include the following practices and situations?)					
•	Location of potential sediment sources			$oxed{\int}$		
•	Does on-site drainage enter into off-site drainage					
•	Dust/Silt fence, wattles, perimeter socks, and matting rolls					
•	Watering					
•	Soil binders, including acrylic polymers					
•	Storm drain inlet protection					
•	Temporary sediment basin					
•	Sediment trap					
•	Flared culvert end sections					
•	Outlet protection					
•	Temporary stream crossing					
•	Ingress/Egress sediment control					
•	Slope roughening/terracing/rounding					
•	Sand bag barrier					
•	Brush or rock filter					
•	Shoveling, sweeping, and disposing					
	-Storm Water Management Practices (Plans address or include the uations?)	foll	OV	ving	g pract	ices
•	Employee training					
•	Vehicle and equipment cleaning, refueling, and maintenance					
•	Dewatering operations					
•	Paving operations					
•	Concrete washout procedure					
•	Structure construction and painting		$\overline{\sqcap}$			
•	Water conservation		同		$\overline{\Box}$	
•	Good housekeeping practices		Ī		Ē	
	4. Construction Material Management, Waste Management and Spill Control Practices (Plans address or include the following practices and situations?)					
•	Material delivery, use, and storage					
•	Spill prevention control, spill kit					
•	Hazardous waste properly stored in designated areas		ī		$\overline{\Box}$	
•	Sanitary/Septic waste management					
•	Liquid waste managed with storage containment devices					
•	Contaminated soil management		$\overline{\sqcap}$			
•	Concrete waste management		$\overline{\sqcap}$			
•	Fertilizer, pesticide, herbicide, fungicide, and biocide management			T

4. 401 Water Quality Certification is provided, if required.		
5. 404 Department of Army Permit is provided, if required.		
6. Coastal Zone Management Permit is provided, if required.		
7. Special Management Area Permit is provided, if required.		
8. Post-construction Stormwater Mitigation Plan is provided, if required.		
9. Grading Permit with temporary erosion control plan is provided. (if project		
requires City and County approval and meets requirements)		
10. Permit for Connection to the State Harbors Drainage System (if applicable)		
11. Permit to Discharge into the State Harbors Drainage System (if applicable)		
12. If multiple permits or approvals are required for the project, BMPs are		
consistent in all permits and plans.
