6.	Community Feedback	7:20-7:40 pm
	 Examine bikeway proposals—suggest changes and revisions Vote your personal priorities 	
7.	Closing Remarks Vince Llorin	7:40-7:45 pm

Bike Plan Hawaii Evaluation Criteria for Bikeway Proposals

Bike Plan Hawaii categorizes bikeway proposals into three timeframes: near-term, midterm, and long-term. These categories guide implementation, but are subject to available resources and environmental conditions. The following criteria have been used to help determine how the proposals are categorized.

Do you think these criteria are important?

	Criteria	Very Important	Somewhat Important	Not Important	No Opinion
Μ	obility and Access				
•	Does the bikeway serve a population center? Does it provide access to a public facility				
	(school, park, library) or commercial area?				
٠	Is it a missing link in the bicycle network?				
•	Does it provide a direct route (major street)? Does it provide an alternate route (street with				
•	lower traffic)?				
Us	sers				
•	Is it a multi-user/multi-mode facility (bikes, pedestrians, wheelchairs, rollerblades, etc.)?				
•	Would it attract visitors (and promote economic development)?				
•	Has the community expressed a preference for the project?				
Sa	fety				
•	Are there non-vehicular hazards (steep slopes, drop-offs, blind curves, prone to rockslides)?				
•	Is it accessible by emergency vehicles?				
In	plementation and Cost				
٠	Has the project begun (e.g., initial planning)?				
•	Is there a need to acquire more right-of-way? Is there a risk of loss to development?				
A	esthetics				
•	Does it have scenic or cultural value?				

Other Important Criteria (please write in)
