

## SECTION 615 - LEVELING SURFACES

**615.01 Description.** This work includes removing irregularities in the natural ground surface within or immediately next to the highway right-of-way. The areas that the Contractor will level or smooth shall be as ordered. \*

**615.02 Materials.** None specified. \*

**615.03 Construction Requirements.** The Contractor shall remove irregularities in the natural ground surface of the designated areas. The Contractor shall use a power-propelled, pneumatic-tired motor grader or other suitable equipment and supplemented by hand labor where required. The surface, when leveled or smoothed, shall provide a surface over which a person may operate the power mowers. \*

Work done under this section shall be exclusive of the clearing, grubbing and final clean-up operations required in other parts of this contract. \*

**615.04 Method of Measurement.** The Contractor shall do only work ordered by the Engineer under this section. The work will be on a force account basis according to Subsection 109.04 - Extra and Force Account Work. \*

**615.05 Basis of Payment.** The Engineer will allocate an estimated amount for the force account work in the proposal under the item "Leveling Surfaces". The actual amount that the Engineer will pay for work under this section will be the sum shown on the accepted force account records. This sum may be more or less than the estimated amount allocated in the proposal. \*

The Engineer will make payment under: \*

Pay Item	Pay Unit
