

SECTION 634 - EXPLORATORY WORK AT STRUCTURE FOOTINGS

634.01 Description. This work includes exploratory drilling, exploratory excavation or other surface or subsurface investigation ordered by the Engineer after the Contractor completes structure excavation at the footings to the footing subgrade. *

634.02 Materials. None specified.

634.03 Construction Requirements. When subgrade or subsurface conditions at structure footings are not according to the contract, the Contractor shall do the exploratory work as ordered by the Engineer. After completion of the exploratory work, the Contractor shall backfill the holes or cavities according to the contract. *

634.04 Method of Measurement. The Engineer will measure exploratory work at structure footings on a force account basis according to Subsection 109.04 - Extra and Force Account Work. *

634.05 Basis of Payment. The Engineer will pay for the exploratory work at structure footings on a force account basis according to Subsection 109.04 - Extra and Force Account Work. *

The Engineer will allocate an estimated amount for the force account work in the proposal. The actual amount that the Engineer will pay under this section will be the sum shown on the accepted force account records. This sum may be more or less than the estimated amount allocated in the proposal. *

The Engineer will make payment under: *

Pay Item	Pay Unit
Exploratory Work at Structure Footings	Force Account
