INTERSTATE H-201 OUTBOUND AUXILIARY LANE, VICINITY OF H-3 UNDERPASS TO FORT SHAFTER OFF-RAMP COMMUNITY NOISE CONTROL, VARIANCE APPLICATION NO. V-1137, DOCKET NO. 19-NR-VN-57

The Hawaii Department of Transportation (HDOT) will be holding a Public Information Meeting and Noise Variance Consultation to inform the public of construction work and to solicit input on the proposed night and Sunday work on the Interstate Route H-201 from the vicinity of the H-3 Underpass to the Fort Shafter Off-Ramp. The Project is estimated to begin as early as March 2020 and major construction activities are expected to be completed by March 2021.

The purpose of the Project is to continue the existing left auxiliary lane for the Aiea/Pearlridge Off-Ramp back toward Fort Shafter to provide an additional lane through the area. The scope of this Project consists of installing striping, pavement markings, signage and traffic counting stations; cold planing, resurfacing, and reconstructing spot areas; cleaning out existing drains; removal of grass and silt buildup adjacent to roadway in spot areas; and trimming of hedges along the freeway median. In lieu of trimming the hedges, the hedges may be removed and replaced with a temporary glare screen.

Pursuant to Chapter 342F-5, subsection (h), Hawaii Revised Statutes, HDOT seeks written comments from interested persons regarding the Community Noise Variance Application for this Project. To comment on the Project you can complete this form and then fold it, staple it, affix proper postage, and mail it to us. You may also submit your comments and any questions to the HDOT staff below:
