Section 107 - Transfers of Operating Funds Between Programs
DEPARTMENT OF TRANSPORTATION - Reporting Period: December 1, 2015 to November 30, 2016

Date	Prog ID	Program Title	MOF	Amount From	Amount To	Impact	Public Purpose Served by Transfer
6/18/2015	TRN102	Honolulu International Airport	B	140500			To cover insufficient payroll funding in FY2015. The shortfall is mainly attributed to the increases in salary payments, filling of vacant positions, and overtime at the smaller airports due to increased operational hours.

	TRN595	Highways Administration	B		64736		
6/18/2015	TRN595	Highways Administration	B	3300000		none	The funds were needed to rebuild three (3) ventilation fans at the H-3 Tunnels on Oahu. These three fans are part of the thirty-two tunnel fan system that provides supply air to the tunnel roadways and exhaust smoke and potentially toxic gases from the same roadways. The total of thirty-two (32) fans were installed at the H-3 Tunnels in 1992 and have been in continuous use, except for those that are no longer operating. While preventive maintenance has been provided during the past twenty-three (23) years, corrosion and electro-mechanical breakdowns have resulted in only half of the fans currently working.
	TRN501	Oahu Highways	B		3300000		
11/5/2015	TRN561	Kauai Highways	B	250000			The funds will be used to refurbish the air conditioning unit for the Materials Testing Laboratory Building. The current unit services the Laboratory Offices and the Curing Room and for the last year, has undergone numerous significant repairs. This creates problems for sensitive electronic equipment in the laboratory as well as having a negative effect on concrete testing which must occur in a controlled environment to achieve accurate results. Improper curing of cement and concrete materials could invalidate test results used for acceptance and verification, which could result in the loss of laboratory accreditation and jeopardize federal project funding.
