Note: Work on the Farrington Highway Resurfacing - Kahe Power Plant to Hakimo Road is scheduled to run from March 18, 2018 to late May 2018.

Resurfacing work between Kahe Power Plant and Hakimo Road is scheduled to start March 18, 2018 and continue until the end of May. Work is tentatively planned to start from the Kahe Power Plant driveway and progress in the west bound direction, before moving on to east bound Farrington Highway, and is planned to occur on Sunday nights through Thursday nights from 9 p.m. to 4 a.m. Permanent striping work, and bus stop relocations and consolidations will continue beyond May after the pavement work is completed. HDOT plans on returning in September to complete the remaining resurfacing work from Hakimo Road to Kili Drive which is estimated to be a 3 month duration. Permanent striping, and bus stop relocations and consolidations will subsequently take place.

HDOT thanks the community for their participation and input into this project to improve overall safety for everyone including pedestrians, bicyclists and motorists.
NOTES:
1. Unless otherwise indicated, bus stop, striping and crosswalk modifications indicated in this figure will occur under Phase 1 of the Farrington Highway Resurfacing Project, Kahe Power Plant to Hakimo Road during the Spring of 2018.
2. Resurfacing and striping modifications between Nanakuli Stream and Helelua Street will be completed by the Farrington Highways Intersection Improvements Project currently under construction and anticipated to be complete before Summer 2018.
